

# The Kirklees Way

- The Kirklees Way is 72 miles (115km) long. Here is a map of the route.
- It is waymarked. This means there are signs to tell you where to go.
- It is 30 years old in 2020!

This graph shows the elevation of the Kirklees Way, 50-600 metres.

Elevation is how high (600m) or low (50m) the path gets.

Go for a short walk. It could be in your room, house or outside.

As you walk, draw in your pad when you go up and down to make your own elevation graph.

Look at your finished elevation graph and pick a section you like.

On a new page draw the section you like but make it bigger (enlarge it) so it fills the page.

Add words on the outside edge to describe your walk.

How can you arrange them along the line?

Go for a short walk. It could be in your room, house or outside in your garden. Be safe.

As you walk, look very carefully at everything around you. Use your pad to write down eight different things you see on your walk.

Follow the 12 steps to make a paper snapper. The red arrows show how to fold.

Use A5 paper or bigger. Don't use small paper as it will be harder to fold correctly.

You can put your thumbs and first fingers in the holes at the bottom.

Then you can use your fingers to open and close the snapper. (See below)

Folding paper to make things is called origami.

You can turn your snapper into a fortune teller by adding some text to different parts.

Use it for fun to tell your own and others fortunes!

Write 4 place names on the outside.

Write 8 things you spotted on your walk on the inside (step 10).

Write 8 animals or people in the middle (step 9 - under the flaps).

Pick a place name (Batley) and count the letters. Batley is 6 letters so open and close the snapper 6 times. Next, pick a word from the inside, count the letters and make the moves. Pick again, but this time open the flap and use the word underneath.

Your fortune: You are going to Batley with your Mum, and you'll see an ant and a mug!
